Professional Summary

Recent B.Tech graduate in Computer Science & Engineering with a specialization in Artificial Intelligence and Machine Learning. Experienced in building scalable, production-grade full-stack applications and AI-powered tools. Proficient in Python, NLP, GenAI, and data engineering with a passion for creating impactful digital solutions in enterprise environments.

Education

COER University | 2021-2025

B.Tech in Computer Science (AI/ML)

CGPA: 7.1/10

City Public School | 2020-2021

Intermediate (Physics/Chemistry/Mathematics)

Percentage: 72.4%

Skills

Languages: Python, JavaScript, SQL, TypeScript

AI/ML: TensorFlow, Keras, OpenCV, scikit-learn, NLP, GenAI, RAG (basic)

Web Development: ReactJS, NodeJS, MongoDB, REST APIs

Dev Tools: Git, GitHub, Figma, Adobe Illustrator

Databases & Messaging: MongoDB, Redis (basic), SQL

Platforms: MS Office, VS Code, Linux CLI

Projects

National Hackathon 3.0

Brain Tumor Detector

- Used VGG16 with Keras/TensorFlow to build a deep learning model achieving 95.2% accuracy in classifying brain tumors from MRI images.

Major Project

E-Book Store

- Developed a full-stack E-Book Store web application using React and MongoDB with Node.js, featuring user authentication, book browsing, genre-based filtering, and cart functionality.

AIML Hackathon

AI Medical Chatbot

- Developed an LLM-powered medical chatbot to deliver real-time, accurate health information and support through natural language interaction.

Achievements

- Finalist – National Hackathon 3.0
- Finalist – University-level AI Hackathon (Alzheimer's Project)
- Completed 10+ AI/ML projects with high-accuracy models
- Demonstrated experience in GenAI and NLP through practical projects
